Subject: Microsoft Settlement

I resent the fact that my taxes are going to pay for litigation against the most successful business in the USA and one that has contributed so much to our way of life. They have done everything right and they deserve their success. Consumers are not hurt by Microsoft they are helped. You can't put Microsoft on equal ground with any other platform manufacturer. They have to earn it.

I would rather have competitive Electric and gas companies. Both suppliers and consumers are hurt by no competition. Microsoft supplies a unique product. It is actually better to have Apple and Microsoft platforms than to have many others. Unification and standardization are desirable.

I am satisfied with the original settlement.
